

目的：说明2015/2起商户在微信中使用支付宝支付的方案。因各种原因，方案可能适时更新，请关注支付宝官方网站公告。

方案概要：确认支付时，提示用户打开外部系统浏览器，在系统浏览器中支付。

方案示例：

文件：

- 1、“ap.js”支付链接处理脚本；
- 2、“pay.htm”提示用户打开外部系统浏览器的页面；
- 3、“demo_get.htm”，假设为您的网站中调用支付宝支付的确认支付页面。

步骤：

- 1、将文件“ap.js”和“pay.htm”拷贝到您的网站根目录；
- 2、在确认支付页面文件中引入“ap.js”，调用_AP.pay的方法，参见“demo_get.htm”

    </div>
  </div>
</div>
<script type="text/javascript" src="ap.js"></script>
<script>
var btn = document.querySelector(".J-btn-submit");
btn.addEventListener("click", function (e) {
  e.preventDefault();
  e.stopPropagation();
  e.stopImmediatePropagation();
  //e1.href 是GET到支付宝收银台的URL
  _AP.pay(e.target.href);
  return false;
}, false);
</script>
```

其中a标签格式如下：

确认支付

```
<script src="ap.js"></script>
```

```
<script>
```

```
// href 是支付宝收银台的URL
```

```
_AP.pay(href);
```

```
</script>
```

如果是POST请求，需要将所需input值拼接，然后调用_AP.pay方法，参见demo_post.htm。
